LOUDSPEAKER

# 630W

## Full-range, On-Wall Loudspeaker

James Loudspeaker introduces the ultimate slim-line, on-wall loudspeaker – the 630W.

Only 2.75" deep, the 630W features two proprietary, 6.5" woofers to provide bass down to 45 Hz and 1" Beryllium Dome, soft-dome tweeter for silky smooth response to 25kHz. A James designed network provides a seamless transition between the woofer and tweeter for excellent on and off axis performance.

The 630W is constructed of aircraft aluminum and includes an aluminum perforated grille to provide years of trouble free use. A marine version is also available (630WM).

The 630W makes an excellent addition to the SPL6 series of LED TV speakers as a matching surround speaker. It also can be used as a standalone onwall or bookshelf with, or without, a companion James subwoofer.

Standard finishes are natural brushed aluminum or black anodized brushed aluminum. Custom colors are available at an additional charge.

White or Black Anodized

Solid brushed aircraft aluminum enclosures are standard

## specifications

Size (HxWxD):	22 x 7.75 x 2.75 (in)
Weight	16 lbs (7.3 kg)
Freq response	45-25 kHz
Sensitivity	92dB @ 2.83V @ 1 Meter
